

## NOE Pole Mounting Enclosure

Nobi NOE Pole Mounting enclosure is a perfect solution for providing an industry-leading protection for telecommunication systems and equipments in outdoor environments. Engineered as a small sized pole mounted outdoor enclosure, with double skin construction using a special design pole platform, makes this enclosure ideal for providing rugged protection for telecommunication systems which sits firmly and sturdy in a pole. Combine it with our Heat Exchanger product makes this enclosure as a perfect long life-rust free-heat managed solution for you.
